

H3331RS232

Model: H3331

The H3331 is a high-precision digital temperature and humidity sensor. It features a stainless steel probe and a rugged, IP67-rated enclosure. The device is designed for industrial applications where accurate environmental monitoring is critical. It supports RS232C communication and has two alarm outputs. The display shows temperature and humidity values, along with status indicators for power, communication, and alarms.
