

**P4151 Pt1000 0°C to +35°C, 4-20 mA**

Model: P4151

OMET Pt1000 sensor unit / module  
PT1000 sensor.

Table

|                       |                                  |
|-----------------------|----------------------------------|
| Accuracy              | ±0.2°C                           |
| 4-20mA output range   | 0 to +35°C                       |
| Operating temperature | -30 to +80°C                     |
| Output - Input        | 4-20mA, 2-wire                   |
| Output                | >24mA                            |
| Input                 | <3.5mA                           |
| IP rating             | IP65                             |
| Power                 | 9-30Vdc, max 24V                 |
| Size                  | 88.5 x 117 x 39.5 mm (W x H x D) |
| Weight                | max 125g                         |
| Life                  | 3 years                          |
